APB Spectra serie				
<u>APB Spectra T serie</u>				
<p>The Spectra-C/Ci and Spectra-T/Ti are high performance analog consoles from APB-DynaSonics designed to offer truly exceptional sound quality, versatility and reliable performance in a range of fixed installation and touring sound applications.</p> <p>Each of these VCA-based models is available with 24, 32, 40, 48 and 56 mono input channels and all sizes feature 4 additional stereo line-input channels. A 24 channel mono-input expander is also available for use with all of the available models for both Spectra-C/Ci and Spectra-T/Ti.</p> <p>Feature rich, Spectra consoles include VCA control on inputs and outputs, mono/stereo/3-speaker LCR monitoring, and inserts on all primary outputs, including the Auxes and Matrixes. The Master VCA output fader can simultaneously control the levels of Left, Right, Center, Mono and any of the four Matrix outputs. The Spectra-C/Ci and Spectra-T/Ti represent a unique, inventive approach to design that literally redefines the potential of live-performance analog consoles for a new generation of users.</p>

APB ProDesk-4 Serie

ProDesk

APB-DynaSonics' ProDesk-4 small-format front-of-house consoles incorporate a wealth of professional features derived directly from the companies APB Spectra Series of consoles. Intended for use in Production, AV and Contracting applications, ProDesk-4 stresses simple operation while providing uncompromised audio quality in a compact package. It is a direct derivative of our well received ProRack-House mixers and answers the request of users for a desktop version of this mixer with more inputs and an expanded master section.
